AJIT AMBADAS METE

A civil engineer who spent most of his childhood from a convent school in Panchgani.

His special skills include monetary management skills and deal making skills as well as someone who has a keen interest in social work and public events.

You can find him either at the gym or running marathons and travelling if one does not find him at ofi ce or client meeting

Currently working as operation head of Sai Enterprises and Amit Packaging.

SCRAP MANAGEMENT CONCEPT

We are offering an unique and easy way to the global and Indian companies to avoid the daily problems they are facing while dealing directly with the local vendors.

One dedicated person(Supervisor) will be given to the companies for monitoring, their yards will be maintained and kept clean, vehicle will not be hold for any reasons ,labors will be skilled and equipped with complete safety gears.

Our mission is to provide a hassle free services to Indian and global organizations, to reduce the burden on land fields , keeping the environment clean, keeping the operation smooth ,conserving natural resources and saving energy

SCRAP MANAGEMENT CONCEPT

Sufi cient labours will be inside the company premises all the Time at every yard for segregating and stacking of the material in a disciplined manner.

It will help us in utilizing the yard space efi ciently and yards will look clean and organized.

Continuous segregation work will ensure that two difierent materials will not get mix and will not go in same vehicle .

We are aiming to become capable of recycling all kind of materials by 2020.
